Commercial

Business owners like you are always looking for ways to save on costs and become more energy-efficient.

“Completed *ALL* my Insurance works after flooding. Harvey Electrical Services was all I needed for everything that needed doing and it was done in no time at all and nothing was out of the way very friendly helpfull and courteous. They also project managed any other work that was required by the loss adjusters Highly Recommended to all. Thanks to all at Harveys for all your hard work.

-Steve Clarke”

Machine Install

Harvey Electrical Services install lighting and electrical sockets as required in a shop fitting. Working on newly refurbished commercial units and we can also offer maintenance work to ensure your business runs smoothly. As well as being part P registered with NAPIT. All parts and labour by Harvey Electrical Services come with a full 12 month guarantee.

LED Lighting

By the year 2023, you will no longer be able to purchase the standard lighting systems which are commonly found in offices, shops, and warehouses. Harvey Electrical Services offer an LED lighting solution that'll help keep your business in line with regulations and standards. When you make the switch to LED you will love...

- The Daylight-like interior conditions, improving mood and efficiency of employees.
- The longer-lasting LED means fewer calls to maintenance for burned out and flickering fluorescents.
- All the money you save on your energy bills.
- Improved carbon-footprint rating, getting you closer to your emissions goals.

Solar Panels

Like all systems, Solar panels also require regular maintenance to ensure that they are continuing to produce energy efficiently and are on track with the figures that were initially quoted prior to the installation. If you have a faulty inverter, your panels are in need of repairing or you are concerned about the price of your monthly bills, the Harvey Electrical Services team are on hand to help resolve the issue.

Testing & Inspection Services

We like to offer our EICR reports as a way to make sure that our commercial clients are getting the most out of the expensive electricity that they are paying for.

- Houses of multiple occupancies like guesthouses and hotels
- Commercial offices and shops
- Construction sites, farms, and industrial factories
- Public buildings like cinemas, hospitals, schools, and sports grounds
- Warehouses

Containment

When installing a network's infrastructure, cable containment is a crucial step that needs to be implemented. The purpose of the containment is to support the cables and make cable management much easier too.

EV Charging

Electrical vehicles are now in higher demand than ever, and Harvey Electrical Services are proud to supply and install EV Charging in the North East. Our team work closely with the supplier to ensure that every customer receives the best quality EV charging solution to keep their vehicles moving.

SLA

We are proud to offer service-level agreements. It is a contract between both a service provider and its customers that document what services the provider will complete. This document will also outline the standards the provider is obligated to meet.

Commercial

Business owners like you are always looking for ways to save on costs and become more energy-efficient.

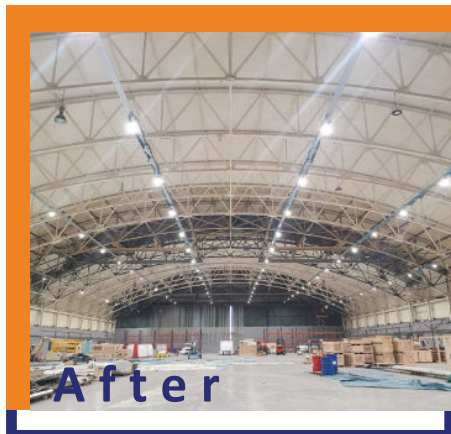

“ This was the 1st time I have used Harvey Electrical Services and it won't be the last. They were able to come out at short notice to carry out some work for me. And was able to put right the electrics for a heating system that the previous electrician had messed up. I would highly recommend them to anyone. They will be getting all my work from now on.

Industrial

Harvey Electrical Services understand that industry leaders like you value quality, integrity, and reliability when it comes to finding contractors. That's where we can help.

“Dear Karl Thank you for organising your guys to undertake the change of our old Distribution Board to a shiny new one. We are very pleased with the workmanship of your staff and would like to commend them for arriving on-time exactly as you had promised, were extremely polite and everything was completed as quoted, they even hovered-up! I can highly recommend your services and will be passing your details onto friends, colleagues and family members.

-Steve Guest”

Radon

Radon is a radioactive gas that occurs naturally when the uranium in soil and rock breaks down. Nobody can see or smell the gas which means that specialist equipment is required to detect it. Typically, the radon level in the air we breathe outside is very low but can often be higher inside buildings... High levels of radon can cause lung cancer, particularly for smokers and ex-smokers. It's important that you have the radon levels in your workplace checked for the welfare of your customers and employees. If you are concerned about the radon levels in your industrial property, Harvey Electrical Services are happy to help.

Fibre Installation

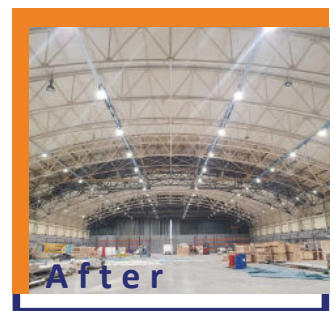

As electrical experts, the team at Harvey Electrical Services offer both domestic, industrial, and commercial fibre installation to your property. Are you looking to make the switch to fibre broadband? We can help you make the transition seamlessly with minimal downtime as we know how important it is that your business remains operational and active. Join the millions of properties that have already made the adjustment and are benefitting from super-fast broadband.

Machine Movement

At Harvey Electrical Services we are proud to offer industrial and commercial machine moves Darlington to help with businesses as they grow and evolve. We work closely with businesses to ensure that every stage of the move is thoroughly thought out and will be completed successfully with minimal to no downtime.

We understand your business and the requirements you may have. Our team also tackle production line moves and repositioning. This process is very meticulous and requires a lot of precision and organisation. The HES team are all trained in health and safety as well as an extensive range of electrical work, making us the perfect partner for your business. We care about your business which is why we pay attention on every detail and work efficiently to complete projects on schedule.

Data Logging

The process of data logging involves the collection and storage of data over a period of time in different systems or environments. It can be done manually by constant human observation or using electronic devices. If you are looking to collect data about a specific, measurable topic or topics, get in touch with our team at Harvey Electrical Services.

Domestic

At Harvey Electrical Services, we understand that when you have an electrical issue, it's a whole life issue.

“ Just to say we found Andy to be very friendly, professional and personable. The work carried out is excellent and we will have no hesitation in recommending his/your services going forward.

I & B Spratt ”

EICR

Landlords are required to have all electrical installations in their rental property checked every 5 years by an electrician. This step that has been taken will improve 4.5 million households in the Private Rented Sector!

CCTV

At HES we can install security and CCTV systems, from a single camera, to fully networked multi camera setups. HES offer CCTV electrical work for domestic and commercial use. As well as being part P registered with NAPIT. All electrical parts and labour by HES come with a full 12 month guarantee.

Garden Lights

We can install the latest LED lighting that can save your organisation money, whilst providing fantastic energy efficiency. Our LED street lighting options are ideal for car parks, large outdoor premises, business parks and industrial estates.

EV Charging

All of the EV charging points our team install allow you to control your charging habits from your phone with various sleek and easy to use apps. Making the switch to electric powered transport has never been simpler and more convenient.

Pulsa Coil

Harvey Electrical Services offer a Pulsacoil repair service package, making sure you are covered if anything goes wrong with your thermal water heater. Pulsacoil repairs can be arranged so that we come and fix the boiler where ever it is situated.

PIV Units

The PIV Unit is a sophisticated system used to combat damp patches and musty odours in your home. The Positive Input Ventilation is a mobile unit that is placed between a loft and the floor below. The air from the loft is filtered into the house to create a positive air pressure. As an alternative to placing the unit in the loft, they can pull air from outside the house too.

Rewires

Harvey Electrical Services offer domestic and commercial rewiring to properties. HES can rewire a house, commercial unit or factory. We also offer a partial rewire; no job is too large or small.

Solar Panels

Here at Harvey Electrical Services, we can provide Solar PV Maintenance and Solar panel repair services to businesses and homes across the North East. Our team will help you find a solution best suited for both your business or home and your budget.

All of our parts and labour come with a full 12 months guarantee.

Schools

Our highly qualified team here at Harvey Electrical Services can suggest the perfect lighting solution for your school.

School Services

LED Lighting, EV Chargers, EICR, Solar Panels

Our work with schools encompasses regular maintenance, testing, and new LED installations. Local schools that work with HES know that every student and staff member is safe due to our rigorous operating safety standards and compliance with regulations.

At Harvey Electrical Services our team will happily arrange a FREE LED lighting survey for any business that is interested in LED lighting. We have a team of LED lighting experts in County Durham who can visit your businesses premises, talk you through all of the options that are available and answer any questions you may have.

Our team at HES are passionate about inching closer to a greener future for the environment which is why we aim to provide customers with energy efficient and environmentally conscious electrical services. It is essential that your EV charging system is right for you which is why our fully qualified, expert, and professional installation team are always on hand to advise you.

Having LED lighting installed could **save a primary school up to £3600 per year** and a **secondary school £15,000 plus a year!** By making the switch to LED lighting in schools, you not only save money and energy, but also see improved scholastic scores, mood, and behaviour from students.

We were approached by Elemore Hall School to complete an LED lighting replacement at their property in Windlestone, County Durham. They were looking to save money and improve their impact on the environment. With LED lighting from HES, they can achieve this and much more! Due to the nature of this project, our team had to ensure minimal down time and interruption, as well as making sure that the project was completed on time and in budget. Not only did we meet our targets, we also exceeded them! Through the installation of our state-of-the-art LED lighting technology, we were able to save them £10,000 per year with a ROI of under 3 years. Because our LED systems require zero maintenance, this will also save the school a lot of money.

ELEMORE HALL
— SCHOOL —

Next time your school requires electrical assistance, don't hesitate to pick up the phone and contact Harvey Electrical Services.

Offices/Retail

Are you looking to make your office space more energy efficient? LED lighting is the perfect solution for helping your business become cleaner and also minimise employee's health risks.

“Harvey Electrical Services re-wired our kitchen and fitted a new circuit board after we were let down by someone else. They came at short notice and did a fantastic job. No big promises or fancy talk, they told me what they would be doing, gave me a price, turned up and did it. I would recommend the firm to anyone and will definitely use them again.

Jenny Radmore”

Offices/Retail Services

LED

Why LED lighting is perfect in an office:

- LED lamps last 10-20 times longer than standard lamps.
- LED lighting is the closest lighting to natural light so therefore there is a lesser chance of eye straining.
- Quite often standard lighting solutions get hot, meaning more energy is used; about 90%. With LED lighting this drops to 5% as there is very little heat coming from the bulbs.

Benefits of LED in retail:

- Shows the products in the best light
- LED can help create a mood, giving the shop a high-end look
It helps to define the store
- Lighting is associated with positivity, this can have an impact on the store's sales

Solar Panels

The advantages of Solar panels are:

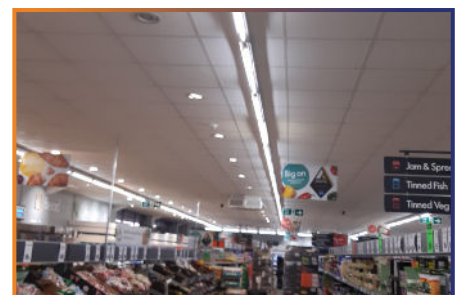

- Low maintenance costs
- Combat greenhouse emissions
- Reduces dependence on fossil fuels
- Renewable energy source
- Improves grid security
- Solar energy is applicable everywhere

CCTV

In recent years the popularity of CCTV systems in both the home and workplace has been driven by the increase in the demand for security. Installing CCTV systems can be cost efficient as it means that you do not have to guard your building 24 hours a day and also do not have to invest into the ongoing expense of hiring security staff.

EICR

An Electrical Installations Condition Report (EICR) will be given to the tenant and landlord from the electrician. The report will need to include details of the inspection that has been carried out and any further work that needs doing to ensure the property is safe.

EV Charging

It is essential that your EV charging system is right for you which is why our fully qualified, expert, and professional installation team are always on hand to advise you.

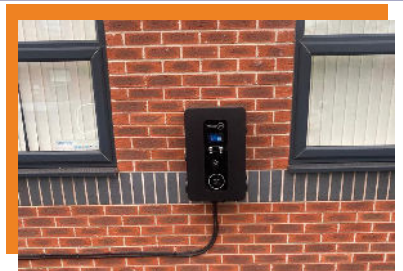

HARVEY
Electrical Services

HES are proud to have multiple partnerships with many reputable EV charging suppliers, including Project EV, which allows us to provide a full range of AC and DC chargers. We are working towards decarbonisation with renewable energy and we believe that electrical vehicle charging is making a huge contribution to this movement.

Case Studies

During our many years of service, HES has had the pleasure of working with a range of great businesses and organisations on numerous electrical projects...

“ Really pleased with the improvements to the lighting in our yard, the payback period is under 2 years, due to continued growth at Tekmar we need to work around the clock & this will help with the safety of our operators.

- Tekmar Energy ”

Tekmar Energy

Tekmar is one of the North East's biggest off shore wind farm providers, helping with designing and developing technologies, as well as manufacturing and completing bespoke systems. When they reached out to our team at HES, their lighting system wasn't allowing them to work as efficiently outdoors as they would have liked during the evenings.

We understood that they wanted to increase the safety for movement in their large commercial yard. The energy-efficient floodlights that we installed created a brighter and safer environment for all members of staff who were working on site. The lighting illuminates the whole of the yard and decreases the risk of any accidents that may occur.

Now that Tekmar has transitioned to a greener energy solution they can expect savings on their bills plus, employees are now able to work productively and safely outdoors during the evenings.

Butterwick Hospice Care

For over 6 years the Harvey Electrical Services team has worked with the Butterwick Hospice to raise money and awareness of the charity as well as carry out a range of electrical services.

We have carried out electrical installations in their retail outlets, shops, warehouses, and the hospice itself.

As the Butterwick Hospice works with vulnerable patients, it is always our priority to ensure that all equipment is up to standard, PAT tested, and secure for the nurses to use. We work closely with the staff to carry out our services in a way that doesn't cause disruption to the day-to-day running of the hospice.

All of the services that the hospice provides are free of charge to those diagnosed with an illness or a loved one. To support in any way possible, we attend various corporate and networking events as well as fundraisers that are held by the hospice.
